

## Errata

The following changes were made to *Rapid Expert Consultation on Understanding Causes of Health Care Worker Deaths Due to the COVID-19 Pandemic (December 10, 2020)*:

p. 4, second full paragraph: The Hughes et al. (2020) reference in footnote 7 was added.

p. 5, first paragraph: The text was changed to correct the reported number of nursing home health care worker deaths from 12,348 to 1,162. The earlier estimate of 12,348 nursing home health care worker deaths was a calculation error made by summing cumulative data instead of weekly data retrieved from the raw CMS COVID-19 nursing home dataset available at <https://data.cms.gov/Special-Programs-Initiatives-COVID-19-Nursing-Home/COVID-19-Nursing-Home-Dataset/s2uc-8wxp> (accessed December 16, 2020).
